

Tombland & Palace Street

Artists impression of the Tombland pedalway scheme; details shown are subject to amendment

Tombland is set to be transformed by the Pedalways into a place for people

- offering more than half of its road space for pedestrian and cyclist use
- a 20mph traffic calmed street with pedestrian crossing points.
- Palace Street will also be 20mph and have traffic calming and cycle facilities.

Work commences Monday 18 May and will be carried out in phases to minimise disruption, we expect work to be complete by late October 2015:

- **Phase 1:** Removal of the roundabout including its traffic islands plus the following works.
Removal of the pedestrian crossing; pedestrians may use the pelican crossing at the Queens Street end of Tombland.
Construction of new footways and loading bays near Maids Head Hotel and shops plus kerb reconstruction at Princes Street junction.
Pedestrians will have access maintained to all doorways at all times, except when essential work is necessary which will be carried out when businesses are closed.
- **Phase 2:** Construction of new paving near to the La Tasca restaurant.
- **Phase 3:** Construction of the footway, cycle track and landscaping near Erpingham Gate and Edith Cavell memorial
During construction the cycle track may be used as a footway on a temporary basis.
- **Phase 4:** Construction of traffic calming and cycle facilities provided on Palace Street.
- **Phase 5:** Road resurfacing of Tombland and Palace Street and new speed reduction tables installed. Road markings completed.
Installation and switch on of new traffic signals at Princes Street junction. This will require Tombland to be closed for a short period towards the end of the road works all bus services and traffic to be diverted.

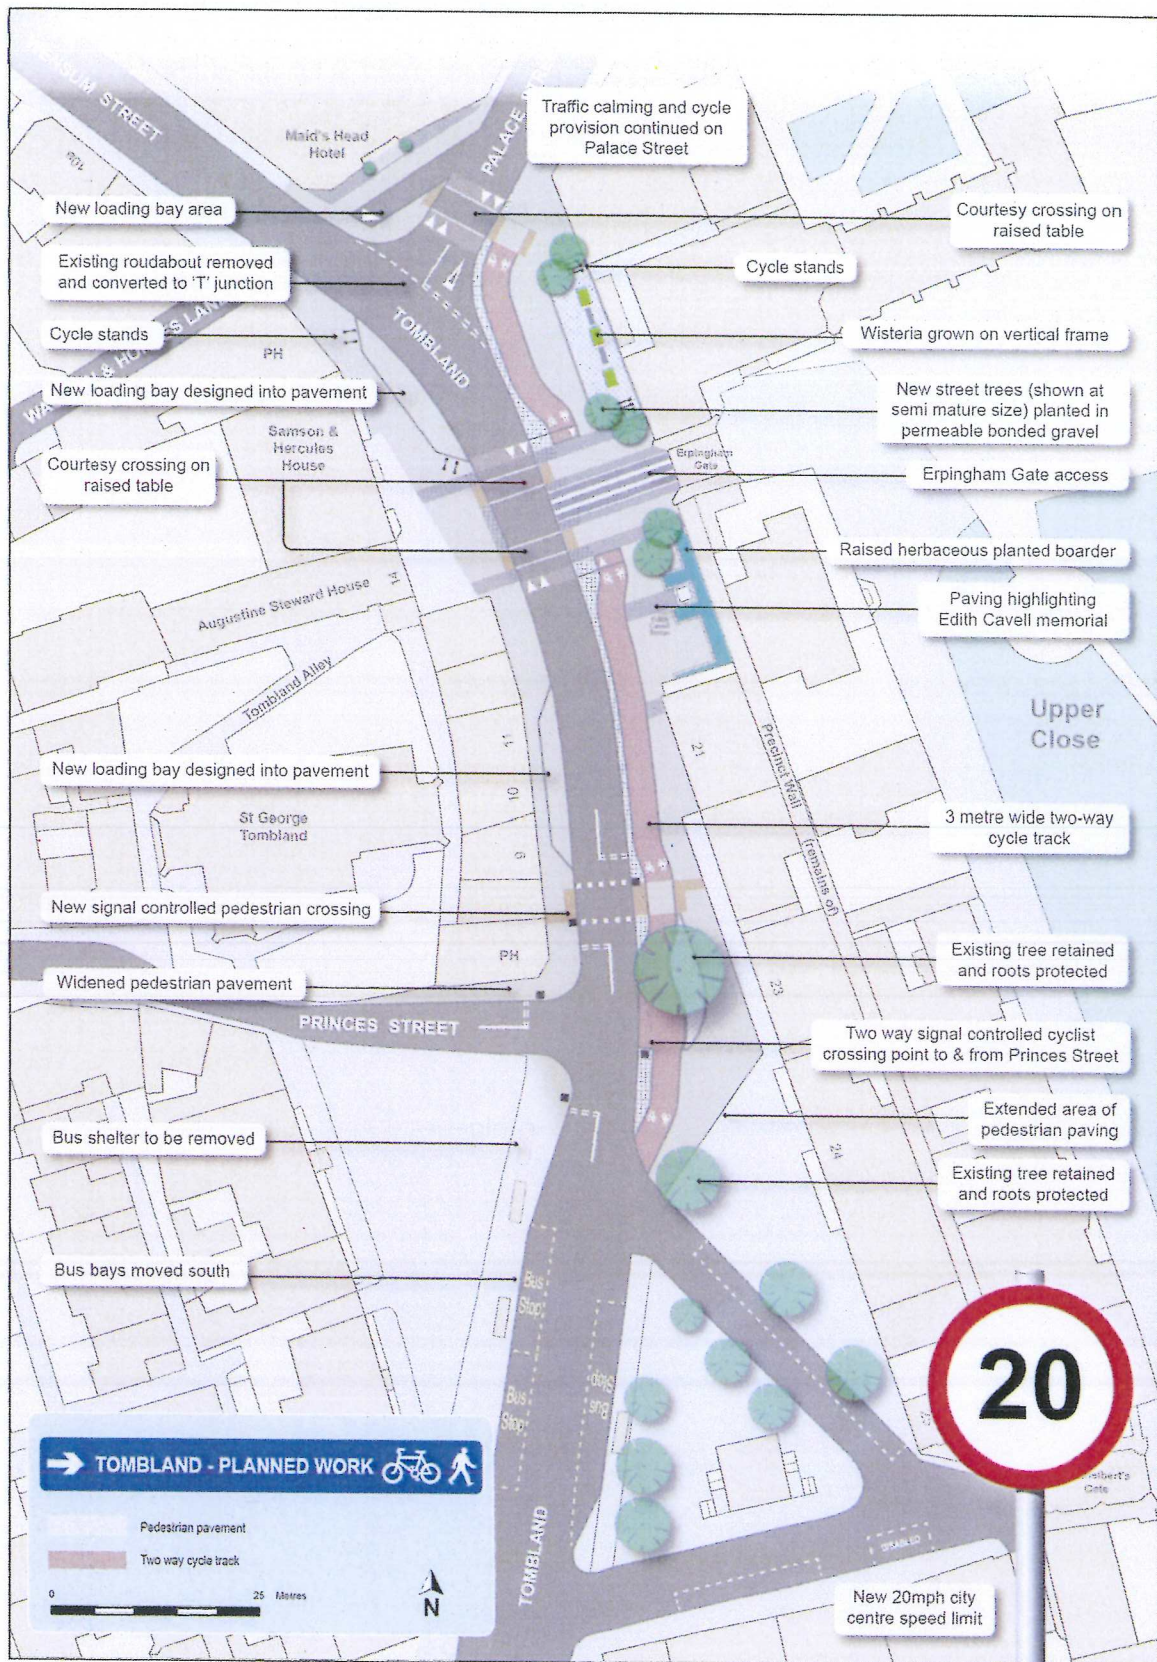

More details:

We apologise for any inconvenience arising from these necessary road works, we have sought to minimise their impact and ensure that the businesses and bus services continue to operate

- We will keep bus services and through traffic running in Tombland for the majority of the construction period; except when resurfacing takes place at the end for a short period
- Palace Street will remain closed to all traffic during the period of works, except when the road will be opened temporarily for the Lord Mayors Procession traffic only.
Diversion signage on the road network will direct inbound traffic via Foundry Bridge.
- We will maintain pedestrian access to businesses affected by the road works at all times; some minor pedestrian diversions will be necessary and loading will be affected
- The Erpingham Gate (adjacent to the Cavell Memorial) will be fenced off and closed to all traffic and pedestrians; vehicular access will only be allowed with agreement of Lafarge Tarmac under their control.
- Road works will be carried out by our contractors Lafarge Tarmac who will work Monday to Saturday 7.30am to 5pm; there will be no road works on Sunday but any traffic management will remain in place such as temporary 2 way traffic lights or fenced off work areas.
- Lafarge Tarmac will have a site compound at St Martins at Palace Plain where a staff porta-cabin will be installed and materials stored.
- In case of an emergency query out of office opening hours our customer contact centre can assist: tel 0344 980 3333 or telephone Norfolk Constabulary
- For all other queries please contact Norwich City Council or view the Background pages that explain the project aims and governance of how decisions were made by Members of the Norwich Highways Agency Committee.

Once completed we anticipate that Tombland to be a high quality public space that can be enjoyed by everyone; providing new public space with two way cycle track and a traffic calmed street.
